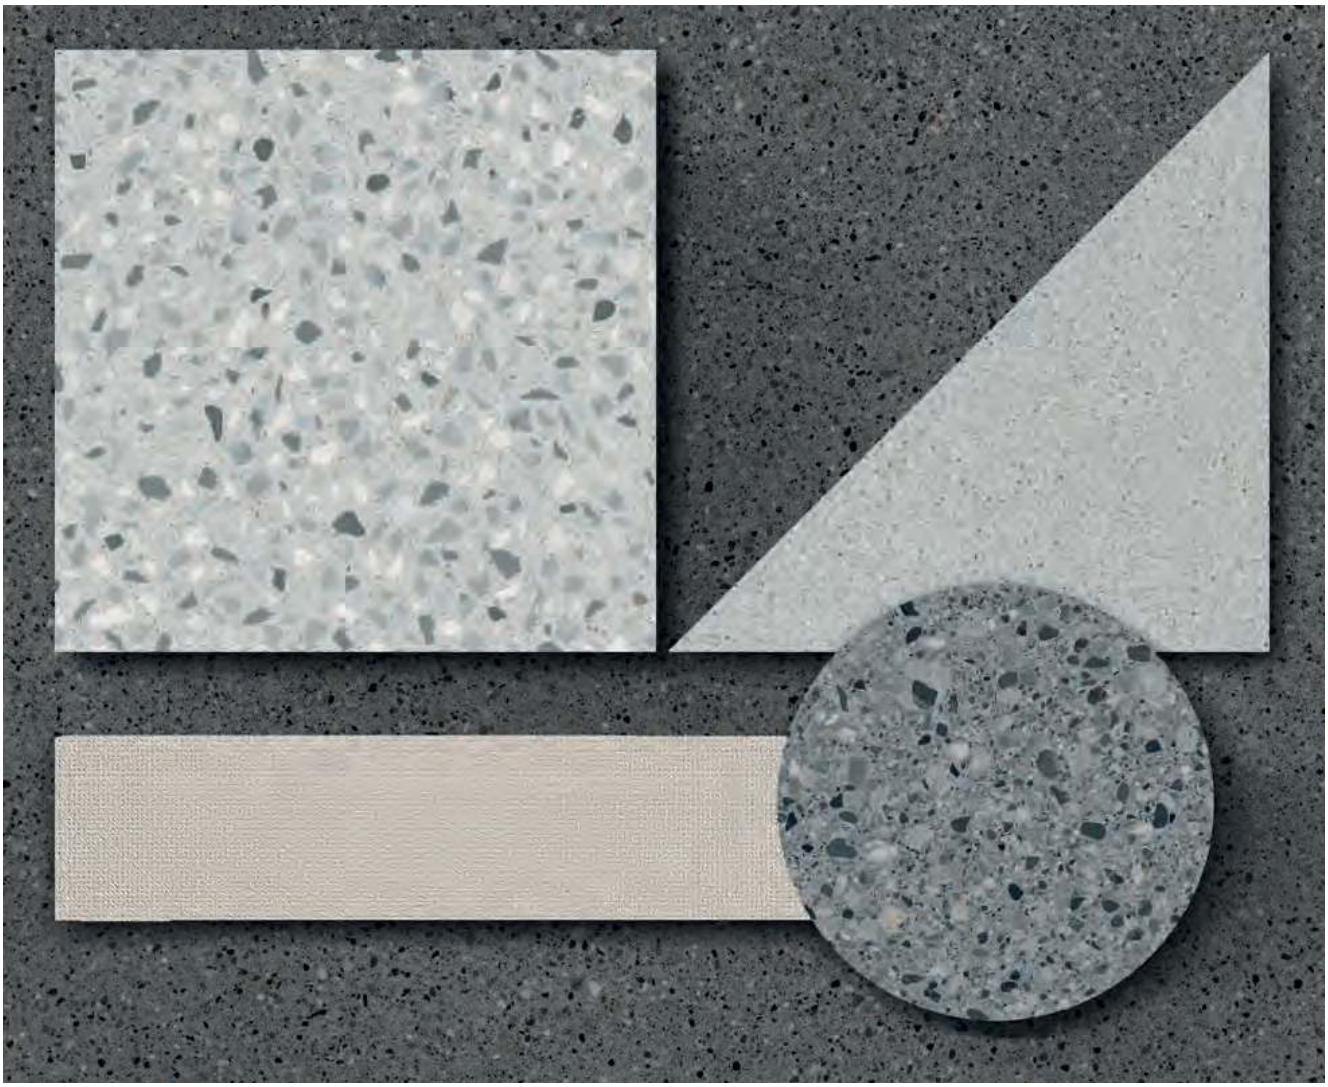
VitrA

CementMix



Cement as a design element

VitrA creates a tile system based upon cement as one of the fundamental elements of modern urban architecture.

Inspired by warm minimalism trend CementMix softens the traditional brutalist look of cement with variety of earthy warm hues.

Through its systematic approach, it offers harmonised colour tones and calm texture options for users. In addition to its calm relief appearance, it re-interprets terrazzo appearance from the past to the present by using modern geometric speckles, natural stone and marble chips patterns.

CementMix

Different levels of cement

CementMix enriches cement with four diverse layers from minimal appearance to modern dense patterns. CementMix brings a brand new dimension to industrial design on both floors and walls, on these four layers named as Fine, Micro, Meso and Flake.

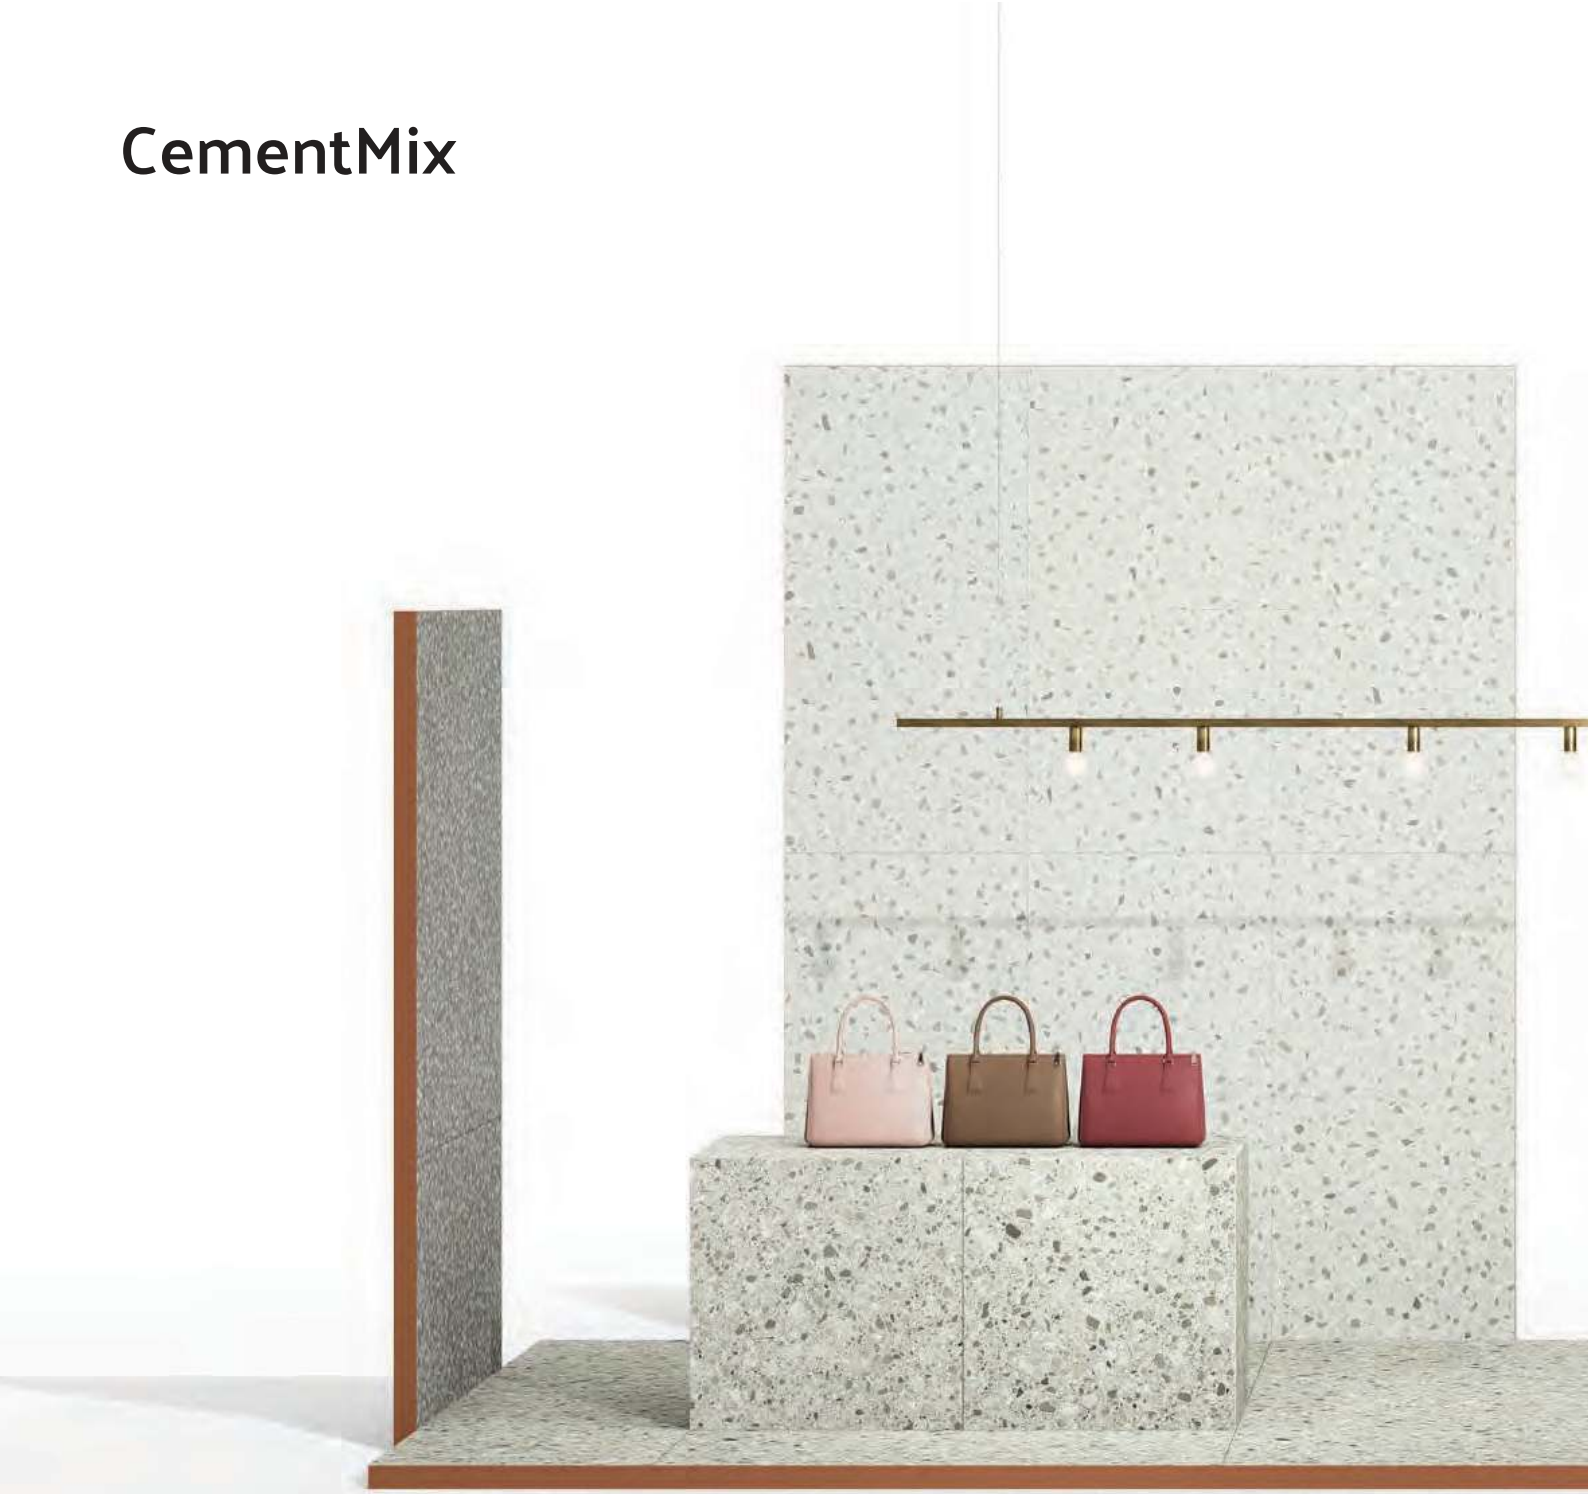
Plaster and wall paper texture is reflected to CementMix Fine which interprets cement in the most minimal and discreet form. In CementMix Micro, calm cement appearance is revitalised by micro dots. In CementMix Meso, sprinkling of stone pieces onto a cement surface is presented for a natural look. In CementMix Flake, which re-interprets conventional terrazzo patterns with the modern industrial design components; there are three different flake interpretations enriched with the modern geometric speckle, natural stone and marble chips patterns.

CementMix

Different shades of cement

Inspired by living textures and warm colours, CementMix interprets different layers of cement appearance in warm and cold colour tones. It offers a modern axis of colours that could be used in compatible with each other through six colour options, three warm and three cold.

CementMix



Different patterns of terrazzo

CementMix Flake combines each terrazzo pattern with the colour tone compatible with its character. Focusing on grey and greige tones, terrazzo designs are presented with light tones for modern geometric speckle patterns, medium tones for natural stone patterns and dark colour tones for marble chips patterns.
