

GEMMA

THE SEMI PRECIOUS
STONE COLLECTION

THE GEMMA

C O L L E C T I O N

Welcome exclusivity into your space.

The Gemma Collection brings new meaning to everyday luxury.

This distinct collection showcases the gem-like beauty of semi-precious stones in bold colours and intriguing patterns - ideal if you are looking for stone that is far from ordinary, and out of this world.

Created in nature's mysterious laboratories over many millennia, these gemstones are mined from the womb of Mother Earth before being carefully cut and shaped to perfection into an artistic piece of slab, bound with high quality resin, as its finished masterpiece.

Every stone will be unique. Every slab cut from the same specimen will vary in an infinite array of colours and depth.

Every finished piece will be an artwork with its own essence of individu-

AGATE

The discovery of Agate stone goes back to third century in Greece. The decomposition of silica present in lava corresponds to the variations of successive layers of crystalline quartz. The vapour vesicles unite with viscous rock and form a large cavity giving the Agate hardness and exceptional size with huge variety of textures and colors. Almost all Agates are translucent and allow light to pass through them.

QUARTZ

Quartz Collection is created from pure semi-precious stones. These stones are mined from the depth of earth. The surfaces of quartz collection form an elegant and poised blend between the timeless luxury and modern sophistication. Their translucent property with slimmering or glistening effect makes this collection extraordinary.
